Keywords

UGentGuest guests guest network internet wifi

Solution (public)

The UGentGuest network is a wireless network specifically for visitors who cannot use [1]Eduroam.

To connect to the UGentGuest network, enter the username and password you received from your contact person at Ghent University.

Please note: data traffic via the UGentGuest network is not encrypted. To protect your personal data, visitors are advised to use encrypted connections such as https, imaps, ssh, etc., or a VPN connection to their own company or institution.
