Congrezzo pay payment registration events congress

Solution (public)

Congrezzo allows you to manage online registrations and payments for your event (congress, symposium, conference, etc.). Unlike Eventmanager, Congrezzo is intended for events with more complex registration options. Events can be created on request via [1]congres@UGent.be. After providing some details, an online registration form will be created and you will be given access to the client environment to manage registrations and payments. If you wish to use this client environment, you will need to fill in an event form. See [2]Online registrations and payments for events for more details. Until further notice, Congrezzo can still be used until the end of 2026.
