Nitro Sign Connective eSignatures ondertekenplatform ondertekensoftware

Solution (public)

Within UGent, we exclusively use the Nitro/Connective platform for digitally signing documents. More information can be found at:<https://www.gonitro.com/security-compliance>.

We do not offer any alternative platforms. If you choose not to use this platform, you must revert to signing documents with pen and paper. UGent staff members can, however, sign documents if the counterparty creates a document using another platform and offers it to us for signature.
